

Conversant Group: The World's First Civilian Cybersecurity Workforce

Assess, Secure, Defend, and Recover Your Infrastructure and Operations

Securitas Summa—security above all else—is our mantra; and at Conversant Group, we will help you optimize the efficiency of your IT operations with security always at the forefront. Today's organization has a host of challenges in keeping its infrastructure high performing, flexible, and available for its users, while also securing it against the cybercriminals and state actors who are continuously probing its defenses. Just one breach can have existential consequences; but many IT teams already have their hands full managing the day-to-day business.

Conversant Group has helped over 500 customers understand their security stance, address their shortcomings, actively defend against threats, and restore operations following a breach (should one unfortunately occur).

We can help you meet your specific needs through three dedicated battalions:

Comprehensive security/ infrastructure assessments informed by real-time threat actor playbooks, IT strategy counsel, and vulnerability remediation.

Comprehensive Managed Protection and Managed Services packages, tailored to the unique needs of your organization and IT environment.

Innovative ransomware/breach rapid recovery and restoration services that reduce downtime by up to 50%.

Why Conversant Group

At **CONVERSANT GROUP**, our mission and duty are to fight cybercriminals and help you optimize your IT landscape through three highly specialized battalions. We carefully recruit, select, and train each member of our team to deliver on the promise of putting your security at the forefront of everything we do, every day. Our battalions support, supplement, and inform each other, so no matter your needs today or in the future, we can be there to partner with you as an expert extension of your team.

We genuinely **consider them as our partner** and extension of the firm. Conversant Group's **response time, technical expertise and strategic direction** are excellent.
